

# OCR Level 3 ICT

A qualification in Information Technology opens up an incredible world of opportunities for work, not only within the technology industry, but also in supporting roles within other industries.

This qualification is a combination of both practical and theory aspects that will enable you to be successful in any employment or further and higher education. The course covers both Adobe and Microsoft software developing a wide range of skills that can be applied to a range of different situations. You will also learn how to plan and manage projects and work effectively with others. The assessment is based on both examined units and coursework. Students don't need to have taken ICT or Computing at GCSE to study this course

## Subject specific entry requirements

*In addition to the standard entry requirements, the following subject entry criteria should be met:*

- 4 in GCSE English
